

## MobileVoiceControl™

BlackBerry 7520™, powered by Nextel

### Quick Start

Version 2.02.10

### To Use:

- 1) Press and Hold the large button on top of the 7520.
- 2) ***At the beep speak your command naturally, while continuing to hold the button.***  
*(holding the unit about 3 inches from the mouth)*
- 3) Release the button. Unit will beep in a few seconds when command is returned.

## Command Syntax:

- 1) **Phone Calls - "Call"** [Contact's name] + [phone type (optional)].

### Tips:

- a) Be sure to use the First and Last name when you speak the Contact name.
- b) Even if the First name is unique, (for example you have only one contact with the first name of Shane), you should still say the First and Last name.

- 2) **Phone Calls with a Number – "Dial"** followed by the phone number digits.

- 3) **Call Voicemail – "Call Voicemail"**

- 4) **Quick Emails:** (Voice Email text is limited to 20 words)

- For new emails:  
"Email [Contact's Name] + **Subject** [subject text] + **Body** [body text]"  
(Note: Subject and Body are optional).
- For Replies to Emails:  
"Reply [body text]"
- For "Reply All" to emails:  
"Reply All [body text]"
- To "Forward" an email:  
"Forward [Contact's Name] + **Body** [body text]"

*Note:* Subject is optional for Reply, Reply All and Forward. If you don't specify a Subject the FW: or RE: Original Subject will be the subject.

- 5) **Calendar**

"Add Appointment [Appointment Text] + **Date** [Date of appointment] + **Time** [time of the appointment]"

- 6) **Web Pages: "Go to Website** [Website URL]"

*Note:* Spell unusual URL names the first time you use them. Subsequent requests for that URL should not have to be spelled.

- 7) **Quick Web:**

- "Weather [ Zip Code]"
- "StockQuote [Stock Symbol]"
- "Sports [Sport Category listed below]"
  1. Major League Baseball
  2. National Football League
  3. National Basketball Association
  4. College Baseball
  5. College Football
  6. College Basketball
  7. National Hockey League
  8. Pro Golf
  9. Auto Racing
  10. Major league soccer
  11. Women National Basketball Association
  12. Professional Tennis

- **Find Business (Yellow Pages)**
- Business Name + Zip Code
- Example ("**Find Business**: Starbucks 45140")

**Special note for 7520 and 7100i users:**

You can say "**Near Me**" instead of a Zip Code or a City/State combination.

**For example:**

"Find Business Starbucks near Me"

*Important Notes:*

- 1) Zip Code does not have to be precise, usually within 25 miles works well.
- 2) Spell unusual Business names the first time you use them. Subsequent requests for that Business Name should not have to be spelled.
- 3) You must be outside when using the "Near Me" option so that the device has access to the satellites to determine the location of your device.

- "**SearchWeb** [Search Text]"
- "**Top Stories**"
- "**Find Movie** [Zip Code]"

*Note:* Zip Code does not have to be precise, usually within 25 miles works well.

- 8) "**Show Contact** [Contact name]"

**Note:** You must have Event Injector Privileges to use this command.

- 9) **Help** "[What can I say?]"

### **Speed and Accuracy**

Using the proper command syntax as defined above, will result in the fastest execution time (usually 3 seconds for phone calls and 10-15 seconds for most other commands) and highest accuracy. If improper syntax is not used, the system will still attempt to fulfill your request, but will generally take more time.

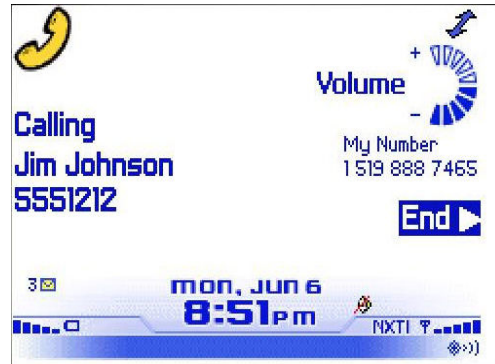

## Instructions:

### 1. Phone Calls

- Just say the Contact's name you want to call.
- *Example* ("Call: Jim Johnson's Mobile")  
Note: Phone designation (i.e. mobile phone, work phone or home phone) is optional.
- You can also place phone calls by saying the number.
- *Example* ("Dial: 513-555-1212")

### 2. Calendar

- Keep tabs on your schedule and your eyes on the road with the voice controlled calendar entry.
- *Example* ("Add Appointment: Dental Appointment. Date: June 10th,2005 Time: 3:00 PM")

#### Appointment Confirmation

Subject: Dental Appointment  
Date: Jun 10, 2005 3:00 PM

### 3. Short Email\*

- Use the voice commands "Send email to:" to dictate new.
- Use the voice commands "Reply", "Reply All", or "Forward" to reply to emails.
- *Example* ("Send Email to: Jim Johnson Subject: Jim comma I'm going to be a few minutes late period Body: Start the meeting without me period New Line John")

To: johnson@gmail.com

Subject: Business

Jim,

I'm going to be a few minutes late.  
Start the meeting without me.

John

\*Email text is limited to 20 words.

#### 4. Web Pages

- Go to web pages simply by saying the web address into your blackberry.
- *Example* ("**Go to Website:** Google.com")

#### 5. Quick Web

- **Weather**
- Check the weather forecast. Say Weather followed by the zip code.
- *Example* ("**Weather:** 10000")

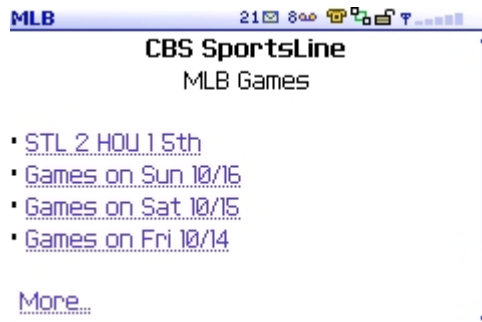

- **Stock Quotes**
- Look up stock quotes using your voice:\*
- *Example* ("**Stock Quotes:** S")

\*Stock quotes are 20 minutes delayed.

- **Sports**
- Receive up to date Sport Scores by saying the sport category. Categories are listed on page 2.
- *Example* ("**Sports:** Major League Baseball")

- **Find Business (Yellow Pages)**
- Business Name + Zip Code
- *Example* ("**Find Business:** Starbucks 45140")

## 6. Show Contacts

Find: Jim Johnson

Jim Johnson

- a. Display Contacts information
- b. *Example ("Show Contact: Jim Johnson")*

**Note:** *You must have Event Injector Privileges to use this command.*

### General Notes:

- 1) MobileVoiceControl™ only works when your Blackberry has data coverage (at least one bar on the signal strength indicator in the upper right hand corner of your Blackberry screen).
- 2) MobileVoiceControl™ can not be used if your Blackberry is already on a phone call.
- 3) If your Blackberry Screen Saver is active, press the top button (or any other key) once quickly to remove the screensaver. Then push and hold the top button and speak your command as usual.
- 4) When using the system to Call Contacts, the system may be slightly slower the first time a contact name is called. The second and all subsequent calls of a particular contact name are generally faster because the system has learned the name.
- 5) Typically, it is recommended that the Blackberry be about 6 inches from mouth while speaking voice commands.
- 6) In Noisy environments, speak louder than usual to make sure your command is distinguishable from the noise.
- 7) For customer support, please email us at [support@mobilevoicecontrol.com](mailto:support@mobilevoicecontrol.com)

### Notes for BES Users:

- 1) If you are on a BES, checking the BES flag in the MobileVoiceControl™ config screen should be checked.
- 2) The first time MobileVoiceControl™ is used, you may get a message on your Blackberry that requests permission to open a socket connection. Use your spacebar to check both the 'Yes' checkbox and the 'Don't ask again' checkbox.
- 3) When using MobileVoiceControl™ to make a phone call on your Blackberry, a screen may appear prior to the Blackberry dialing your requested number that asks permission to dial. This is a BES setting that your BES/IT manager can change if desired. Once changed, the permission screen no longer pops up. For more information go to <http://www.mobilevoicecontrol.com/BES.aspx>

### Tips:

- 1) If a contact has only a first name and MobileVoiceControl is having a hard time with the recognition of that contact, adding a last name to the contact will help MobileVoiceControl™ to better recognize your request for that Contact.
- 2) Website names are often difficult for the system to recognize. For unusual website names, please spell the site name the first time you use it. For example, say "Goto Website 'M' 'Y' 'S' 'I' 'T' 'E' .com. You should not have to spell the site name in subsequent requests.
- 3) Remember, to dial a number, use the "Dial" command followed by the number. Do not use the "Call" command for dialing numbers.

### System Requirements:

To install MobileVoiceControl™, users need the following minimum requirements.

- 1) Model 7520 with Nextel unlimited data service
- 2) OS version 4.0.0249 or higher on the Blackberry (note version 4.1 is preferred)
  - a. *To check the version that you have on your Blackberry go to Wrench Icon (Options) and then to the "About" section. Version number will be on the third line and start with the letter "v".*
- 3) Either BlackBerry Internet Email Service or be connected to a BES\*
- 4) Currently, this U.S. English version is only available for sale to U.S. and Canada residents
- 5) Normal airtime charges apply for calls and emails made using MobileVoiceControl™

Bluetooth Headset Support: MobileVoiceControl™ is designed to support most Bluetooth headset models but due to the numerous headset vendors, compatibility can not be guaranteed.
